Town of High River Municipal Census 2010

In the interest in obtaining up to date population figures to ensure full benefit of grants and available funding the Town of High River undertook a Municipal Census in 2010. The official Census period was May 25, 2010 – June 30, 2010.

The census was this year done both online, phone in, as well as door to door.

A Personal Identification Numbers (PIN) was generated and was unique to each household and allowed residents to enter their census data on line. Census Takers were hired to distribute PIN's to each residential household. This was done in the week immediately preceding the Census start date. The first two weeks of the Census data collection was strictly by on-line and phone in access only. At the end of the first two weeks the Census Takers were given information on which residences had not responded and they proceeded to make contact with those households to obtain the census information.

Both on line and door to door were successful, realizing about a 50/50 split in method of use. We realized a successful 91.91% completion of residences in Town. Our census takers did a fantastic job of tracking down the numbers.

We thank all of those who responded to the census, your responses assists in gaining access to very valuable grant monies used for the betterment of the Town as a whole.
